Chart 6 Table 6

The diagram illustrates the axle group configuration for a vehicle. It shows five axles, numbered 1 through 5, represented by circles. Axles 1, 2, 3, and 4 are single axles, while axle 5 is a dual axle, indicated by two circles connected by a line. The spacings between the axles are labeled A, B, C, D, and E. A dimension line below the axles indicates the 'TOTAL OF SPACINGS' from the center of axle 1 to the center of axle 5.

AXLE GROUP CONFIGURATION: SINGLE - SINGLE - SINGLE - DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows four axles, labeled 1, 2, 3, and 4, represented by circles. Axle 1 is on the far left. Axle 2 is to its right, with a spacing 'A' between them. Axle 3 is further right, with a spacing 'B' between axles 2 and 3. Axle 4 is on the far right, with a spacing 'C' between axles 3 and 4. A fourth spacing 'D' is shown between two points on axle 4, indicated by a line with arrows at both ends. A long horizontal line with arrows at both ends spans the distance from the center of axle 1 to the center of axle 4, labeled 'TOTAL OF SPACINGS'.

Chart 10 Table 10

The diagram illustrates the axle layout for a vehicle. It shows five axles, numbered 1 through 5 from left to right. Axles 1, 2, 4, and 5 are represented by single circles, indicating single axles. Axles 3 and 5 are represented by two circles each, indicating dual axles. The spacing between the centers of the axles is labeled as follows: A (between 1 and 2), B (between 2 and 3), C (between 3 and 4), D (between 4 and 5), and E (between 5 and 6). A long horizontal line with arrows at both ends spans the entire length from axle 1 to axle 6, and is labeled 'TOTAL OF SPACINGS'.

AXLE GROUP CONFIGURATION: SINGLE - SINGLE - DUAL - DUAL

Chart 11 Table 11

The diagram illustrates the axle group configuration for a vehicle. It shows five axles represented by circles. Axle 1 is a single axle on the left. Axle 2 is a single axle. Axles 3 and 4 are dual axles, indicated by a bracket labeled '3' above them. Axle 5 is a single axle on the right. The spacings between the axles are labeled A, B, C, D, and E. A dimension line at the bottom indicates the total length of the spacings, labeled 'TOTAL of SPACINGS'.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL

Chart 24 Table 24

The diagram illustrates the axle group configuration for a single-dual-dual setup. It shows three axles represented by circles. Axle 1 is on the left. Axles 2 and 3 are on the right. Spacing A is between axle 1 and axle 2. Spacing B is between axle 2 and axle 3. Spacing C is between axle 3 and axle 4. Spacing D is between axle 4 and axle 5. A bracket below the diagram indicates the total of spacings A, B, C, and D.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL

The diagram illustrates the axle group configuration for a single-dual-dual setup. It shows three axles represented by circles. Axle 1 is a single axle on the left. Axles 2 and 3 are dual axles on the right. Spacing A is between axle 1 and axle 2. Spacing B is between axle 2 and axle 3. Spacing C is between axle 3 and axle 4. Spacing D is between axle 4 and axle 5. A line labeled 'TOTAL OF SPACINGS' spans from the first axle to the last axle.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates five different axle group configurations labeled 1 through 5. Each configuration shows a horizontal line representing the axle arrangement with circles representing axles. Spacings are labeled A through G. Configuration 1 shows a single axle. Configuration 2 shows a dual axle setup. Configuration 3 shows a dual axle setup with a different spacing. Configuration 4 shows a single axle. Configuration 5 shows a dual axle setup. A 'TOTAL OF SPACINGS' line is shown at the bottom of the diagram.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates a truck chassis with eight axles labeled A through H. Axles A, B, C, and D are on the left side, while E, F, G, and H are on the right side. Axles A, C, E, and G are single axles, while B, D, F, and H are dual axles. The diagram shows the relative positions of the axles and the spacing between them. Labels A, B, C, D, E, F, G, and H are placed above their respective axles. The diagram is used to define the axle spacings and unit weights for the table below.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates a five-axle configuration. The axles are represented by circles. Above the axles, horizontal lines with arrows indicate the distances between them, labeled A, B, C, D, E, F, and G. Below the axles, a line with arrows indicates the total distance from the first to the last axle, labeled 'TOTAL OF SPACINGS'. The axles are arranged in a sequence: Single, Dual, Dual, Single, Dual.

AXLE GROUP CONFIGURATION: SINGLE—DUAL—DUAL—SINGLE—DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows a horizontal line representing the axle arrangement. From left to right, there is a single axle labeled '1', followed by a dual axle set labeled '2' and '3' (indicated by a bracket), then a single axle labeled '4', and finally a dual axle set labeled '5' and '6' (indicated by a bracket). Spacing labels A, B, C, D, E, F, and G are placed between the axles. A line labeled 'TOTAL OF SPACINGS' spans the entire length of the axle group.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates a truck chassis with a single axle (A) and a dual axle group (B, C, D, E, F, G). The axles are represented by circles, and the distances between them are labeled with letters A through G. The dual axle group consists of two axles (B and C) followed by a single axle (D), then another dual axle group (E, F, G). The diagram shows the relative positions and spacings of these axles.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows five axles, labeled A through G, arranged in a row. Axles A, B, and C are on the left, and axles D, E, and F are on the right. The spacing between axles is indicated by arrows and labeled with numbers 1 through 5. The total spacing between the first and last axle is also indicated by a long arrow at the bottom.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates the axle layout for a vehicle configuration. It shows five axles, numbered 1 to 5 from left to right. Axles 1, 3, and 5 are single axles, represented by a single circle. Axles 2 and 4 are dual axles, represented by two circles side-by-side. The spacings between the axles are labeled with letters: A (between 1 and 2), B (between 2 and 3), C (between 3 and 4), D (between 4 and 5), E (between 5 and 6), F (between 6 and 7), and G (between 7 and 8). A line labeled 'TOTAL OF SPACINGS' spans the entire length of the axle group.

The diagram illustrates a horizontal arrangement of six axles, represented by circles. The axles are labeled 1 through 6 from left to right. Above the axles, various spacing labels are indicated: 'A' between axles 1 and 2, 'B' between axles 2 and 3, 'C' between axles 3 and 4, 'D' between axles 4 and 5, 'E' between axles 5 and 6, and 'F' between axles 6 and 7. A line labeled 'TOTAL OF SPACINGS' spans the entire length from axle 1 to axle 7. The diagram also shows the relative positions of the axles, with some axles being single and others being dual (represented by two circles).

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows a single axle (1) followed by a dual axle group (2, 3, 4, 5, 6). The axles are represented by circles, and the spacings between them are labeled A through G. A dimension line at the bottom indicates the 'TOTAL OF SPACINGS'.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates a truck chassis with seven axles labeled A through G. Axles A, B, C, and D are single axles, while E, F, and G are dual axles. The diagram shows the relative positions of the axles and the spacing between them, indicated by dimension lines and labels. The axles are represented by circles, and the spacing between them is indicated by horizontal lines with arrows at the ends. The labels A, B, C, D, E, F, and G are placed above the corresponding axles. The diagram is used to define the axle group configuration for the table below.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates a truck chassis with seven axles labeled A through G. Axles A, B, C, and D are single axles, while E, F, and G are dual axles. The diagram shows the relative positions of the axles and the spacing between them, indicated by dimension lines and labels. The axles are represented by circles, and the chassis frame is shown as a line connecting them. The diagram is used to define the axle group configuration for the table below.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows a sequence of axles: a single axle (1), followed by a dual axle group (2, 3, 4), then another dual axle group (5, 6), and finally a single axle (7). The axles are represented by circles. The spacing between the centers of the axles is indicated by horizontal lines and labeled with points A through G. A line labeled 'TOTAL OF SPACINGS' spans the distance from the center of axle 1 to the center of axle 7.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows six axles, labeled 1 through 6, arranged in a sequence. Axle 1 is a single axle, while axles 2 through 6 are dual axles. The spacing between the centers of the axles is labeled with letters A through G. A line labeled 'TOTAL OF SPACINGS' spans the distance from the center of axle 1 to the center of axle 6. The diagram also shows the relative positions of the axles to the vehicle's frame, with axle 1 at the front and axle 6 at the rear.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates a truck chassis with six axles labeled 1 through 6. Axle 1 is a single axle at the front. Axles 2, 3, and 4 form a dual axle group in the middle. Axle 5 is a single axle at the rear, and axle 6 is a dual axle at the very rear. Spacing dimensions (A through G) are indicated between the axles. The gross weight for each axle is listed in the table to the right.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates five different axle group configurations labeled 1 through 5. Each configuration shows a horizontal line representing the axle arrangement, with circles representing axles. Points A, B, C, D, E, and F are marked along the line. A bracket labeled 'TOTAL OF SPACINGS' spans the entire length of the configurations. Configuration 1 shows a single axle at point A. Configuration 2 shows a dual axle at point B. Configuration 3 shows a dual axle at point D. Configuration 4 shows a single axle at point E. Configuration 5 shows a dual axle at point F.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates five different axle group configurations labeled A through I. Each configuration shows a horizontal line representing the axle arrangement, with circles representing axles. Points 1 through 5 are marked along the line, indicating specific axle positions or centers. Configuration A shows a single axle at point 1. Configuration B shows a single axle at point 1 and a dual axle at point 2. Configuration C shows a single axle at point 1 and a dual axle at point 2. Configuration D shows a single axle at point 1 and a dual axle at point 2. Configuration E shows a single axle at point 1 and a dual axle at point 2. Configuration F shows a single axle at point 1 and a dual axle at point 2. Configuration G shows a single axle at point 1 and a dual axle at point 2. Configuration H shows a single axle at point 1 and a dual axle at point 2. Configuration I shows a single axle at point 1 and a dual axle at point 2.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates five axle group configurations labeled 1 through 5. Each configuration shows a horizontal line with circles representing axles. Configuration 1 is a single axle. Configuration 2 is a dual axle (two axles close together). Configuration 3 is a dual axle. Configuration 4 is a single axle. Configuration 5 is a dual axle. Points A through G are marked along the configurations to indicate specific axle positions or spacings. A dimension line at the bottom indicates the total spacing between the first and last axle in each configuration.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates various axle group configurations for a vehicle. It shows a horizontal line with points labeled 1 through 6. Above the line, there are circles representing axles. Below the line, there are labels A through G. A line labeled 'TOTAL OF SPACINGS' runs horizontally across the middle. A line labeled 'TOTAL OF AXLES' runs horizontally across the bottom. The diagram shows different combinations of single and dual axles at different points.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates a truck chassis with seven axles labeled A through G. Axles A, B, and C are on the left side, while axles D, E, F, and G are on the right side. Axles A and B are dual-axle configurations, while C, D, E, F, and G are single-axle configurations. The diagram shows the relative positions of the axles and the spacing between them, indicated by dimension lines and arrows. The spacing between axles A and B is labeled 'A', between B and C is 'B', between C and D is 'C', between D and E is 'D', between E and F is 'E', and between F and G is 'F'. The total length of the chassis is indicated by a dimension line at the bottom labeled 'TOTAL OF SPACINGS'.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates five different axle group configurations, labeled 1 through 5. Each configuration shows a horizontal line representing the axle line, with circles representing axles. Configuration 1 shows a single axle (A). Configuration 2 shows a dual axle (B). Configuration 3 shows a dual axle (C). Configuration 4 shows a single axle (D). Configuration 5 shows a dual axle (E). The diagram also includes labels for axle spacings (A, B, C, D, E, F, G) and axle unit weights (1, 2, 3, 4, 5).

AXLE GROUP CONFIGURATION. SINGLE — DUAL — DUAL — SINGLE — DUAL

The diagram illustrates five different axle group configurations labeled 1 through 5. Each configuration shows a horizontal line with circles representing axles. Configuration 1 shows a single axle (A). Configuration 2 shows a dual axle setup (A, B). Configuration 3 shows a dual axle setup (A, B) with a single axle (C) in the middle. Configuration 4 shows a dual axle setup (A, B) with a single axle (C) in the middle and a single axle (D) at the end. Configuration 5 shows a dual axle setup (A, B) with a single axle (C) in the middle and a single axle (D) at the end. The labels A through G are placed above the axles. The labels 1 through 5 are placed below the axles. A vertical line on the right indicates the total of spacings.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows a horizontal line representing the chassis with points A, B, C, D, E, F, and G marked. Below this line, circles represent the axles. A bracket labeled 'TOTAL OF SPACINGS' indicates the distance between points A and G. Above the line, points 1 through 5 are marked with vertical lines and circles, representing specific axle positions. The diagram shows a sequence of single, dual, dual, single, and dual axle configurations.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates the axle group configuration for a vehicle. It shows five axles, numbered 1 through 5 from left to right. Axles 1, 3, and 5 are single axles, while axles 2 and 4 are dual axles. The spacing between the axles is labeled A through G. A line labeled 'TOTAL OF SPACINGS' spans the distance from the first to the last axle.

AXLE GROUP CONFIGURATION: SINGLE - DUAL - DUAL - SINGLE - DUAL

The diagram illustrates an axle group configuration with eight axles, numbered 1 through 8 from left to right. Axles 1, 3, 5, and 7 are single axles, while axles 2, 4, 6, and 8 are dual axles. The axles are represented by circles. Above the axles, points 1 through 8 are marked. Below the axles, labels A through H are placed. The labels A, B, C, D, E, F, G, and H are positioned below axles 1 through 8 respectively. The diagram also shows the total of spacings between the axles, indicated by a line with arrows at both ends and the text 'TOTAL OF SPACINGS'.

(2) The sum required by a divisional board for the year 1971 for secondary school purposes shall be apportioned among the municipalities in the school division by,

 - (i) the result determined under clause *a* for the municipality, or

- (e) adding together the results obtained for each such municipality under clauses *c* and *d*.

(3) Where, in a municipality or a part thereof, the general level of assessment for 1970 is higher than for 1969, or the general level of assessment for 1971 is higher than for 1970,

(4) Where,

- (a) the post-subsidy break-even mill rate for 1969 for public school purposes; or
- (b) the post-subsidy break-even mill rate for 1969 for secondary school purposes,

of a municipality or a part thereof, before being adjusted pursuant to subsection 3 where applicable, is less than the quotient obtained by dividing 100 by the assessment equalization factor for 1969 of the municipality, such quotient shall be used;

purposes in respect of the parts of the municipality, shall be apportioned among such parts in proportion to the assessments for apportionment purposes for 1971 that are rateable for public school purposes in respect of such parts.

(6) Where two or more mill rates are used under clause *a* of subsection 2 in respect of the parts of one municipality, the sum determined for the municipality under clause *e* of subsection 2, less the sum of the payments in lieu of taxes for 1971 for secondary school purposes in respect of the parts of the municipality, shall be apportioned among such parts in proportion to the assessments for apportionment purposes for 1971 that are rateable for secondary school purposes in respect of such parts. 3. Where, in a municipality, the assessment roll on which taxes are to be levied in the year 1971 is not revised and certified on or before a date fifteen days before the date on which the apportionment is made under this Regulation, the assessment roll for taxation purposes in 1971 as returned to the clerk may be used for the purposes of this Regulation, and the requisitions made by the divisional board for the year 1972 shall be adjusted in respect of an overpayment or underpayment made to the divisional board by the municipality, arising from a difference between the apportionment made by the use of the assessment roll as returned to the clerk and the apportionment that would have been made by the use of the assessment roll as subsequently revised and certified. O. Reg. 58/71, s. 3.

4. This Regulation applies in respect of the apportionment of the sums required by a divisional board for public school purposes and for secondary school purposes for the year 1971. O. Reg. 58/71, s. 4.

THE SECURITIES ACT, 1966

O. Reg. 182/71.

General.

Made—April 28th, 1971.

Filed—May 3rd, 1971.

REGULATION MADE UNDER THE SECURITIES ACT, 1966

1. Section 19a of Ontario Regulation 101/67, as made by section 13 of Ontario Regulation 208/70, is revoked and the following substituted therefor:

19a. For the purpose of the reports required under section 19 or in any references to the property of the company contained in either Form 11 or Form 11A,

- (a) "ore" means a natural aggregate of one or **more minerals which, at a specified time and place, may be mined and sold at a profit, or from which some part may be profitably separated;**
- (b) "proven ore" or "measured ore" means that material for which tonnage is computed from dimensions revealed in outcrops or trenches or underground workings or drill holes and for which the grade is computed from the results of adequate sampling, and for which the sites for inspection, sampling, and measurement are so spaced and the geological character so well defined that the size, shape, and mineral content are established, and for which the computed tonnage and grade are judged to be accurate within limits which shall be stated and for which it shall be stated whether the tonnage and grade of proven ore or measured ore are *in situ* or extractable, with dilution factors shown, and reasons for the use of these dilution factors clearly explained;

(c) "probable ore" or "indicated ore" means that material for which tonnage and grade are computed partly from specific measurements, samples, or production data, and partly from projection for a reasonable distance on geologic evidence, and for which the sites available for inspection, measurement, and sampling are too widely or otherwise inappropriately spaced to outline the material completely or to establish its grade throughout;

(d) "possible ore" or "inferred ore" means that material for which quantitative estimates are based largely on broad knowledge of the geologic character of the deposit and for which there are few, if any, samples or measurements, and for which the estimates are based on an assumed continuity or repetition for which there are reasonable geological indications, which indications may include comparison with deposits of similar type, and bodies that are completely concealed may be included if there is specific evidence of their presence.

19b. For the purpose of the reports required under section 19 or in any references to the property of the company contained in either Form 11 or Form 11A,

- (a) estimates of possible ore or inferred ore shall include a statement of conditions within which the inferred material occurs; and
 - (b) the arithmetical average of any amount of sampling is not necessarily representative, unless the distribution of values and number of samples are properly taken into account, and a statement of how samples were taken shall be given, and where mineralization is erratic, the method of treating erratic values, shall be given in the narrative of the report.
2. Instruction 3 of paragraph c of item 7 of Form 11 of Ontario Regulation 101/67 is revoked and the following substituted therefor:
 3. For the purpose of this item:
 - (i) "ore" means a natural aggregate of one or more minerals which, at a specified time and place, may be mined and sold at a profit, or from which some part may be profitably separated;
 - (ii) "proven ore" or "measured ore" means that material for which tonnage is computed from dimensions revealed in outcrops or trenches or underground workings or drill holes and for which the grade is computed from the results of adequate sam-

pling, and for which the sites for inspection, sampling, and measurement are so spaced and the geological character so well defined that the size, shape, and mineral content are established, and for which the computed tonnage and grade are judged to be accurate within limits which shall be stated, and for which it shall be stated whether the tonnage and grade of proven ore or measured ore are *in situ* or extractable, with dilution factors shown, and reasons for the use of these dilution factors clearly explained;

(iii) "probable ore" or "indicated ore" means that material for which tonnage and grade are computed partly from specific measurements, samples, or production data, and partly from projection for a reasonable distance on geologic evidence, and for which the sites available for inspection, measurement, and sampling are too widely or otherwise inappropriately spaced to outline the material completely or to establish its grade throughout;

(iv) "possible ore" or "inferred ore" means that material for which quantitative estimates are based largely on broad knowledge of the geologic character of the deposit and for which there are few, if any, samples or measurements, and for which the estimates are based on an assumed continuity or repetition for which there are reasonable geological indications, which indications may include comparison with deposits of similar type, and bodies that are completely concealed may be included if there is specific evidence of their presence;

(v) estimates of possible ore or inferred ore shall include a statement of conditions within which the inferred material occurs; and

(vi) the arithmetical average of any amount of sampling is not necessarily representative, unless the distribution of values and number of samples are properly taken into account and a statement of how samples were taken shall be given, and where mineralization is erratic, the method of treating erratic values shall be given in the narrative of the report.

3. Instruction 5 of paragraph c of item 7 of Form 11 of Ontario Regulation 101/67 is revoked and the following substituted therefor:

5. For the purposes of clause (5) of paragraph (c) of this item:

(i) "crude oil" is a mixture that consists mainly of pentanes and heavier hydrocarbons, which may contain sulphur compounds, and that is recoverable at a well from an underground reservoir, and that is liquid at the conditions under which its volume is measured or estimated, and includes all other liquid hydrocarbons so recoverable except natural gas liquids;

(ii) "natural gas" is a mixture, consisting principally of hydrocarbons that may contain non-hydrocarbon gases such as carbon dioxide, hydrogen sulphide or nitrogen, which mixture is recoverable from an underground reservoir and is in the gaseous phase or in solution with crude oil in the reservoir;

(iii) "natural gas liquids" are the hydrocarbon components propane, butanes, and pentanes plus, or a combination of them, which hydrocarbon components are subject to recovery from raw gas as liquids by the processes of condensation or absorption, which recovery takes place in field separators, scrubbers, gas processing and reprocessing plants, or cycling plants;

(iv) "commercial production" is output from a well of such quantity of petroleum substances as, having regard to the cost of drilling and production and the price, kind and quality of such production, would justify from a commercial and economic point of view the drilling of a similar well in the immediate surroundings;

(v) "proved reserves underlying a property" are the estimated economically recoverable quantities of crude oil, natural gas, and natural gas liquids, including the reserves to be obtained by enhanced recovery processes demonstrated to be successful, from that portion of an area delineated by gas-oil or oil-water or gas-water contacts in drilled wells, or which can be reasonably evaluated as economically productive, on the basis of drilling, geological, geophysical, and engineering data, but reserves in undrilled prospects cannot be classed as proved reserves;

(vi) "proved developed reserves" are those proved reserves which will be produced from existing wells or facilities;

(vii) "proved undeveloped reserves" are those proved reserves which are not recoverable from existing wells or facilities or from those zones in existing wells which have been cased-off, but which can be recovered through the drilling of additional wells;

(viii) "probable reserves" of crude oil, natural gas and natural gas liquids include proved reserves plus an estimate of any additional reserves which may be recovered from the known pool or from that portion underlying the properties. The estimates of probable reserves are as realistic as can be determined on the basis of the information available. The area considered probable shall be the estimated ultimate size of the reservoir, or of that portion underlying the properties including the proved area and shall be based on a realistic interpretation of the geological or geophysical, or geological and geophysical, data available at the time the estimate is made. Probable reserves to be obtained by the application of enhanced recovery processes include proved reserves, reserves from the additional probable area, and increased recovery over and above that recognized in the proved category which can be realistically estimated to be ultimately economically recovered from the pool or such portions as underlies the properties.

O. Reg. 316/71.

General.

Made—July 20th, 1971.

REGULATION MADE UNDER THE SECURITIES ACT, 1966

1. Ontario Regulation 101/67, as amended by Ontario Regulations 55/68, 223/68, 395/68, 162/69, 85/70, 208/70, 269/70, 385/70, 489/70, 168/71, 182/71 and 296/71, is further amended by adding thereto the following Part:

PART XII

FINANCIAL DISCLOSURE

76.—(1) For the purpose of sections 76 to 79 of this Part,

- (a) "ordinary shares" means those shares of a company which represent the residual equity in the earnings of the company;
- (b) "potential dilutive factors" include potential conversions of senior shares or debt

obligations, exercises of rights, warrants and options and contingent issuances existing at the end of the period that would be dilutive, if they occurred;

- (c) "senior shares" means all the shares of a company other than the ordinary shares.

(2) In determining whether shares are ordinary shares or senior shares it is the rights and privileges of the shares in relations to the earnings of the company rather than their corporate designation which shall govern.

77.—(1) The calculations of basic earnings per share shall be based on the ordinary shares outstanding during the period and on earnings available to the holders of ordinary shares, and prior claims on income shall be deducted for purposes of the calculations.

(2) Income figures used in the calculation of basic earnings per share shall be the reported amounts reduced by,

- (a) as to non-cumulative senior shares, the dividends declared, payable in cash or otherwise, during the period;
- (b) as to cumulative senior shares, the prescribed dividend, payable in cash or otherwise, whether or not declared.

(3) Where ordinary shares have been issued during the period, the basic earnings per share shall be calculated using a weighted average of shares outstanding during the period.

(4) In the case of business combinations or acquisitions involving the issue of ordinary shares, the calculation of the weighted average of ordinary shares outstanding during the period shall consider the ordinary shares as having been issued at the date from which the results of operations of the acquired business are included in the income statement.

(5) In the case of ordinary shares issued on conversion of senior shares or debt obligations, the calculation of the weighted average of ordinary shares outstanding during the period shall consider the ordinary shares as having been issued as at the date of termination of the dividend or interest obligations.

(6) Where ordinary shares have been issued in connection with a stock dividend on ordinary shares or there has been a stock split or reverse split during the period or subsequent to the date of the balance sheet, the basic earnings per share shall be calculated recognizing the new share structure as though it had existed from the beginning of the period.

(7) In calculating basic earnings per share where ordinary shares have been issued as a stock dividend on senior shares, the ordinary shares shall be recognized only from the date of issue.

78.—(1) For the purposes of calculating fully diluted earnings per share the income figures shall be those determined in accordance with subsections 1 and 2 of section 77 increased by the following,

- (a) the amount of dividends applicable to convertible senior shares for the period;
- (b) the amount of interest expensed for the period, after income taxes, on convertible debt obligations; and
- (c) imputed earnings, after income taxes, on the cash which would have been received on the exercise of rights, warrants and options and contingent issuances at an appropriate rate of return.

(2) The rate of return used for imputing earnings in subsection 1 shall be disclosed together with the dollar amount of imputed earnings after income taxes.

(3) Fully diluted earnings per share figures for the period shall be calculated as though all ordinary shares related to potential dilutive factors had actually been issued at the beginning of that period or date of issuance of the convertible or other security, if later.

(4) Where the basis of conversion or the exercise price will change from time to time, the calculation of fully diluted earnings per share shall be based on the conversion or the exercise of rights which have the most dilutive effect on earnings per share.

(5) The calculation of fully diluted earnings per share shall exclude any potential conversion of senior shares or debt obligations, exercise of rights, warrants and options and contingent issuances that would increase earnings per share or decrease a loss per share.

(6) Conversions or exercises of rights that do not become effective within ten years following the date of the balance sheet shall not be considered as a dilutive factor.

(7) Fully diluted earnings per share figures of a holding company shall reflect any dilutive factors which exist in subsidiaries which are consolidated or carried on an equity basis.

79. Where unconsolidated subsidiaries are carried by a holding company on a cost basis, the note to the financial statements which discloses the increase or decrease in the holding company's interest in the undistributed income of the subsidiaries during the period shall be supplemented by disclosing basic earnings per share, and where applicable, fully diluted earnings per share computed as if the investment in the subsidiaries had been carried on an equity basis.

80. For the purpose of sections 80 to 83 of this Part,

- (a) "common shares" means the shares of a company to which there is attached no preference, right, condition, restriction, limitation or prohibition set out in the instrument of incorporation of the company other than a restriction on the allotment, issue or transfer;
- (b) "economic unit" includes a business or any unit of business conducted by any person or company or any combination of persons or companies regardless of the form in which the business or unit of business is carried on;
- (c) "pooling" and "pooling of interests accounting" include accounting in the financial statements of the combined company for the net assets acquired at the value at which they are carried in the books of the combining companies and the restatement of the comparative financial statements as though the companies had been combined for that period;
- (d) "purchase accounting" includes accounting in the financial statements of an acquiring economic unit for the net assets acquired at their cost to that economic unit on the date of acquisition;
- (e) "special shares" means all shares of a company other than common shares.

81.—(1) The acquisition equation referred to in paragraph 17 of subsection 3 of section 125 of the Act shall be,

- (a) net assets acquired in the transaction, comprised of the amount of,
 - (i) net assets, other than goodwill, at the book value of the seller,
 - (ii) adjustment of net assets, other than goodwill, if necessary,
 - a. on purchase, to fair value,
 - b. on pooling of interests, to conform with the accounting practices of the acquiring company,
 - (iii) any goodwill on the books of the seller, and
 - (iv) on purchase, the premium or discount ascribed to goodwill; or on pooling of interests, the excess, if any, of consideration given over total net assets on the books of the seller;

equated to,

- (b) consideration given, at fair value, for net assets acquired, comprised of the amount of,

- (i) cash, bank loans and other working capital payments,
- (ii) long term debt obligations,
- (iii) common shares,
- (iv) special shares, and
- (v) any other consideration, direct or indirect, indicating the nature thereof.

(2) Where part of the assets mentioned in clause *a* of subsection 1 includes net assets, other than goodwill, on the books of the seller or includes goodwill on the books of the seller, the notes to the financial statements which contain the acquisition equation shall also disclose the amount, if any, by which those values have been written up on the books of the seller within five years preceding the acquisition date.

(3) Where part of the consideration mentioned in clause *b* of subsection 1 is given by way of long term debt obligations, common shares or special shares, the notes to the financial statements which contain the acquisition equation shall also disclose,

- (a) the terms of the debt obligations, including interest payable thereon, convertible features, if any, terms of repayment and other material conditions; or,
- (b) the number, description and book value of the shares issued or exchanged,

as the case may be.

82.—(1) Where the purchase method is used in accounting for a business combination, there shall also be disclosed by way of notes to the financial statements,

- (a) the name and a brief description of each economic unit acquired, and where shares are acquired, the percentage of outstanding equity shares acquired;
- (b) a statement that purchase accounting was used;
- (c) the legal method by which the acquisition took place;
- (d) the date of acquisition and the period for which results of the operations of the acquired economic unit are included in the income statement of the acquiring economic unit; and
- (e) whether it is proposed to amortize any goodwill arising as a result of the purchase and, if so, an outline of the plan of amortization.

(2) Where the purchase method is used in accounting for a number of relatively minor acquisitions, information may be combined for disclosure.

83. Where the pooling method is used in accounting for a business combination, there shall also be disclosed by way of notes to the financial statements,

- (a) the name and a brief description of each company brought into the combination, the percentage of equity shares of each company entering into the combination, and the percentage of the total securities outstanding represented by the securities issued, if any, in the combination;
- (b) a statement that pooling of interests accounting was used;
- (c) the date of the combination; and
- (d) the legal method by which the combination took place.

NOTES:

1. TO THE PARENTS OR CUSTODIANS

Hearings under *The Child Welfare Act, 1965* are held in the Provincial Court (Family Division). They are not open to the press except with the leave of the judge.

You are, of course, entitled to your own legal advisor at the hearing. If you feel you cannot afford to retain a legal advisor you should apply to the nearest Legal Aid Office to discuss the matter. If you, as the parent or custodian, are not twenty-one years of age, the Court will appoint a guardian *ad litem* to protect your interests at the time of the hearing.

The judge at the hearing may make one of several orders respecting your child, whether or not you are present, namely,

- (a) he may dismiss the application;
- (b) he may adjourn it;
- (c) he may adjourn it and require the children's aid society to supervise the child in your home;
- (d) he may order the child to be made a ward of the society for a temporary period of time not exceeding twelve months and such order may be reviewed from time to time but in no case shall an order be made that results in the child being a ward of the society for a continuous period of more than twenty-four months; or
- (e) he may order the child to be made a ward of the Crown.

The judge may order you to pay an amount of \$1.50 per day for part of the cost of maintaining the child in the care of the children's aid society where any of the foregoing orders results in the society assuming the care of the child.

As an agent of the Province, the children's aid society having the care of wards assumes the rights and responsibilities of a legal guardian for any child who becomes a ward by an order of the court. The society may place a Crown ward on adoption.

Any order of the judge made at the hearing may be appealed to a county or district court judge within thirty days of the making of the order. At the appeal hearing new evidence may be presented and further points of law raised.

In the event that your child has been made a Crown ward and you, at some future time, wish the child returned because of changes in your circumstances or for other reasons, you should ask your local children's aid society if it will apply to the Court for termination of the Crown wardship and the return of the child to you, or you may apply yourself to the Provincial Court (Family Division) for such termination.

TERMINATION WILL NOT BE GRANTED IF THIRTY DAYS HAVE EXPIRED FROM THE DATE OF THE ORDER OF CROWN WARSHIP AND THE SOCIETY HAS ALREADY PLACED THE CHILD ON ADOPTION.

If you are confused or uncertain about your rights, your child's rights, procedures of the Court or any other matter related to the hearing, wardship, access to your child or visiting arrangements should he go into the care of the society, discuss it fully before the date of the hearing with your children's aid society, legal advisor or an official of the Court.

2. To be sent to the Municipality, the Director of Child Welfare or the Regional Welfare Administrator of the Department of Social and Family Services as applicable

CONTRACT OF INSURANCE

BETWEEN:

THE CROP INSURANCE COMMISSION OF ONTARIO,

hereinafter referred to as "The Commission",

OF THE FIRST PART

—and—

.....,
of the.....of.....
in the.....of.....

OF THE SECOND PART

WHEREAS the insured person has applied for insurance against the hazard of being unable to seed or plant under The Extended Coverage for Seeding Hazards Plan, hereinafter referred to as "the plan";

NOW THEREFORE, subject to *The Crop Insurance Act (Ontario), 1966* and the regulations made thereunder, where the insured person suffers a loss due to inability to seed or plant resulting from one or more of the perils designated in the plan, the Commission, subject to the terms and conditions hereinafter set forth, agrees to indemnify the insured person in respect of such loss.

TERMS AND CONDITIONS

INSURABLE LAND

1. No land shall be insured under this contract unless the insured person is insured under a contract of insurance under the Act for a spring sown crop.

CAUSES OF LOSS INSURED AGAINST

2. This contract insures against loss arising when the seeding or planting of a crop is prevented by excessive moisture or flood.

CAUSES OF LOSS NOT INSURED AGAINST

3. This contract does not insure against, and no indemnity shall be paid in respect of a loss resulting from,

- (a) the negligence, misconduct or poor farming practices of the insured person or his agents or employees;
- (b) a shortage of labour or machinery; or
- (c) a peril other than the perils designated in the plan.

DURATION OF INSURANCE

4. This contract is in force for the term in respect of which it is made.

EXTENT OF INSURANCE

5.—(1) The insured person shall offer for insurance all land intended to be seeded or planted to a spring crop on the farm or farms operated by him in Ontario, and subject to subparagraph 2, this contract applies to all such land.

(2) This contract does not apply to, and no indemnity is payable in respect of land,

(a) that is orchard land, pasture, woodland, seeded to a perennial crop, fall sown or intended for summer fallow; or

(b) that, in the opinion of the Commission, is not insurable.

COVERAGE

6. The coverage provided by this contract shall be determined by the Commission in accordance with section 8 of the plan.

INDEMNITY

7.—(1) Subject to subparagraphs 2 and 3, the maximum indemnity payable in respect of the insured land shall be the amount obtained by multiplying the coverage in dollars per acre by the number of insured acres.

(2) For the first year in which a contract of insurance is in effect, no indemnity is payable in respect of deductible acreage as follows:

1. The first 5 per cent of systematically tile drained land.

2. The first 10 per cent of all other land.

(3) For subsequent years in which a contract is in effect with the insured person,

(a) the deductible acreage for each claim year shall increase by 5 per cent to a maximum of 20 per cent; and

(b) for each no claim year immediately following two consecutive no claim years, the deductible acreage shall decrease by 5 per cent to a minimum of 5 per cent.

(4) Notwithstanding subparagraphs 2 and 3, the deductible acreage in respect of a claim shall not be less than the minimum percentage of deductible acreage under subparagraphs 2 and 3 applied to the total acreage.

PREMIUM

8. The amount of premium payable by the insured person in respect of the insured land shall be determined and paid in accordance with the provisions of the plan.

TERM OF INSURANCE

9. The term of insurance is the period from the 1st day of March to the 1st day of August next following.

EVALUATION OF LOSS

10. For the purposes of this plan, a loss shall be deemed to have occurred when, as a result of one or more of the insured perils, the insured land or any part thereof in excess of the deductible acreage prescribed by paragraph 7 remains unseeded after the last date for planting in the area or after such other date as may be determined from time to time by the Commission.

NOTICE OF LOSS

11.—(1) Where loss results from one or more of the perils insured against, the insured person shall notify the Commission in writing as soon as the loss is evident but not later than the 10th day of July in order that an inspection may be made.

(2) Where the insured person fails to notify the Commission pursuant to subparagraph 1 a claim by the insured person is invalid and his right to indemnity is forfeited.

INCORRECT ACREAGE

12.—(1) Where the actual insurable acreage is greater than the acreage insured, for the purpose of calculating the indemnity, the number of acres unplanted due to an insured peril shall be deemed to be reduced proportionately.

(2) Where the actual insurable acreage is less than the acreage insured, for the purpose of calculating the indemnity, the number of insured acres shall be deemed to be reduced accordingly.

MISREPRESENTATION, VIOLATION
OF CONDITIONS OR FRAUD

13. Where the insured person,

(a) in his application for insurance,

(i) gives false particulars to the prejudice of the Commission, or

(ii) knowingly misrepresents or fails to disclose any fact required to be stated therein;

(d) willfully makes a false statement in respect of a claim under the contract of insurance; or

- (e) by any act or omission forfeits his right to recover indemnity under the plan for a spring sown crop to which this plan is an extension,

a claim by the insured person is invalid and his right to recover indemnity is forfeited.

WAIVER OR ALTERATION

14. No term or condition of this contract shall be deemed to be waived or altered in whole or in part by the Commission unless the waiver or alteration is clearly expressed in writing signed by the Commission or a representative authorized for that purpose by the Commission.

INTEREST OF OTHER PERSONS

15. Notwithstanding that a person other than the insured person holds an interest of any kind in the insured land, for the purposes of this contract,

- (a) the interest of the insured person in the insured land is deemed to be the full value of the insurance; and
- (b) except as provided in paragraph 16, no indemnity shall be paid to any person other than the insured person.

ASSIGNMENT OF RIGHT TO INDEMNITY

16. The insured person may assign all or part of his right to indemnity under this contract but an assignment is not binding on the Commission and no payment of indemnity shall be made to an assignee unless,

- (a) the assignment is made on a form provided by the Commission; and
- (b) the Commission consents thereto in writing.

ADJUSTMENT OF LOSS

17.—(1) The indemnity payable for loss shall be determined in the manner prescribed by this contract.

(2) The Commission may cause the loss to be appraised by any method that it deems proper.

(3) No indemnity shall be paid for a loss unless the insured person establishes that the loss or part thereof resulted directly from one or more of the perils insured against.

(4) Where a loss resulted partly from a peril insured against and partly from a cause of loss not insured against, the Commission shall determine the amount of the loss that resulted from the cause of loss not insured against, and the indemnity payable by the Commission under this contract shall be reduced accordingly.

PROOF OF LOSS

18.—(1) A claim for indemnity in respect of the insured land shall be made on a proof of loss form provided by the Commission and shall be filed with the Commission not later than the 10th day of July.

(2) Subject to subparagraph 3, a claim for indemnity shall be made by the insured person.

(3) A claim for indemnity may be made,

- (a) in the case of the absence or inability of the insured person, by his agent; or
- (b) in the case of the absence or inability of the insured person or on his failure or refusal to do so, by an assignee under an assignment made in accordance with paragraph 16.

(4) Where required by the Commission, the information given in a proof of loss form shall be verified by statutory declaration.

Exploratory Licences and Production
Leases for Natural Gas in Lake Erie.
Made—December 22nd, 1971.
Filed—December 29th, 1971.

REGULATION MADE UNDER
THE MINING ACTEXPLORATORY LICENCES AND
PRODUCTION LEASES FOR NATURAL
GAS IN LAKE ERIE

EXPLORATORY LICENCE

1.—(1) The Minister may issue an exploratory licence in Form 1 authorizing the holder to explore for natural gas on Crown lands under the waters of Lake Erie.

(2) The licence shall be issued only upon application in writing to the Minister.

(3) The application shall be accompanied by,

(a) a description of the area for which the application is made; and

(b) a statement showing the financial ability of the applicant to undertake the exploratory work required by this Regulation.

(4) The Minister may,

- (a) consider applications from more than one applicant in respect of a specific area or areas and may request each applicant to submit a detailed plan of proposed development;
- (b) offer for sale by tender the right to obtain a licence or licences where more than one application has been received for a specific area or areas; and
- (c) issue a licence or licences to the applicant who, in his opinion, will develop the area or areas most advantageously. O. Reg. 546/71, s. 1.

2. The licence shall describe the area in accordance with the grid system, as shown on the plan filed in the office of the Registrar of Regulations at Toronto as No. 1440. O. Reg. 546/71, s. 2.

3. No licences shall be issued for partial tracts except where such tracts are adjacent to the International Boundary. O. Reg. 546/71, s. 3.

4. Applications for licences will be considered quarterly and the date for receipt of such applications will close on the first day of the months of January, April, July and October and such licences, when issued, shall be dated accordingly. O. Reg. 546/71, s. 4.

5. Where a request is made in writing to have licences issued other than quarterly as prescribed by section 4, the Minister may consider such applications and where such consideration is given, the Minister shall offer for sale by tender, the right to obtain a licence or licences for a specific area or areas and shall give public notice of the sale, specifying the area or areas and the method of tendering. O. Reg. 546/71, s. 5.

6. An exploratory licence shall be issued for a term not to exceed ten years and shall have an anniversary date of January 1st. O. Reg. 546/71, s. 6.

7. The annual rental for an exploratory licence is \$94.50 for each whole tract and 15 cents per acre for each partial tract payable in advance but during the first year of the licence where such period is less than twelve months, the rental shall be determined on a *pro-rata* basis. O. Reg. 546/71, s. 7.

8.—(1) The licensee shall expend for each tract or fraction thereof,

- (a) during the first year, the sum of at least \$500, but where such period is less than twelve months the expenditure shall be determined on a *pro-rata* basis;
- (b) during the second year, the sum of at least \$500;

(c) during the third year, the sum of at least \$750; and

(d) for the remainder of the term of the licence, the sum of at least \$1,000 per year,

in geophysical exploration or drilling in the area specified in the licence.

(2) Where the Minister consents thereto, partial tracts may be combined for the purpose of expenditures on the basis of 630 acres being equivalent to one tract.

(3) Where the Minister consents thereto, a licensee may surrender his licence in whole or in part at any time upon giving written notice thereof to the Minister at least thirty days before the surrender is to take effect.

(4) Where a surrender is made and accepted under subsection 3, the expenditure for the year of the term in which the surrender is made shall be that required for the area described in the licence prior to the surrender, but the expenditure for any subsequent year or years of the term shall be based on the remaining area. O. Reg. 546/71, s. 8.

9. Where, during the final year of the term of the licence, the licensee is prevented by weather, water or other conditions acceptable to the Minister, from carrying out the geophysical exploration or drilling required by this Regulation, the Minister may, upon application in writing within thirty days of the end of the final year of the term of the licence, extend the licence for a period not exceeding six months and this extended period shall be considered part of the final year of the term. O. Reg. 546/71, s. 9.

10.—(1) Where, during any year of the term of the licence, the licensee expends a sum of money greater than that required under this Regulation for that year, he may credit the excess amount against the sum of money required to be expended in any other year or years of the term of the licence.

(2) Where a licensee who is the holder of more than one licence for areas under the same body of water expends during one year a sum of money in respect of the area under one licence greater than that required under this Regulation, he may credit the excess amount to one or more of the other licences under the same body of water, provided such other licence or licences have been issued prior to or in the year of the carrying out of the work. O. Reg. 546/71, s. 10.

11. Where separate holders of separate licences for areas under the same body of water jointly engage in geophysical exploration or drilling, each licensee may credit the amount actually expended by him to any or all of the licences held by him under the same body of water. O. Reg. 546/71, s. 11.

12.—(1) Where the sum of money expended by a licensee in respect of a licence in any year of the term of the licence is less than the minimum required by section 8 for the purposes therein, the licensee shall deposit with the Minister, on or before the 1st day of January of the following year, a sum of money equal to the difference between the amount expended and the minimum required to be expended.

(2) Amounts deposited with the Minister shall be in cash or in the form of,

- (a) bearer bonds having a current value of at least 90 per cent of their face value of,
 - (i) the Province of Ontario,
 - (ii) the Hydro Electric Power Commission of Ontario, or
 - (iii) the Government of Canada; or
- (b) a letter of credit guaranteed by a chartered bank of Canada. O. Reg. 546/71, s. 12.

13.—(1) The sums of money expended by a licensee in the year following the year in respect of which an amount has been deposited under section 12 shall be applied firstly to the credit of that preceding year and any balance of money expended that exceeds the amount deposited shall be applied to the credit of the current year.

(2) Where, during the year following the year in respect of which an amount has been deposited under section 12, the licensee expends a sum equal to or greater than the total of the minimum required for that year and the amount deposited, the amount deposited shall be refunded to the licensee.

(3) Where, during the year following the year in respect of which an amount has been deposited under section 12, the licensee expends a sum less than the total of the minimum required for that year and the amount deposited, the licensee shall deposit with the Minister such additional sum of money as is required to make the amount on deposit with the Minister equal to the difference between the amount expended and the minimum amount required to be expended by section 8. O. Reg. 546/71, s. 13.

14.—(1) Where an amount has been deposited with the Minister in respect of a licence, and the licensee,

- (a) fails to deposit any further amounts in the amount and within the times required by this Regulation; or
- (b) fails to expend the minimum amounts required by section 8 within the term or extended term of the licence,

that part of the amount deposited that equals the difference between the minimum required to be expended in the year for which the deposit was made, and the amount expended for that year, is forfeit to the Crown in right of Ontario.

(2) Where part of an amount deposited with the Minister is forfeited, the balance shall be refunded to the licensee within thirty days after the date of the forfeiture.

(3) Upon forfeiture of an amount deposited with the Minister, the licence, in respect of which the deposit was made, shall be cancelled. O. Reg. 546/71, s. 14.

15. Where a licensee is in default of one or more licences and such licence or licences have been cancelled or surrendered, the Minister may cancel, in whole or in part, any or all other licences held by the licensee where, in his opinion, the licensee is unable to satisfactorily develop the area or areas contained in the licence or licences. O. Reg. 546/71, s. 15.

16.—(1) Every licensee shall submit to the Minister reports, maps and drilling logs in duplicate, covering all geological and geophysical examinations, drilling or other exploratory or development work for which he is requesting expenditure credits, within six months of completion, except those documents submitted in accordance with *The Petroleum Resources Act, 1971* and the regulations thereunder.

(2) Except with the consent of the licensee, material submitted under subsection 1 shall not be made public for one year from the date of completion of the work or for such longer period as the Minister, at his discretion, may direct. O. Reg. 546/71, s. 16.

17.—(1) On or before the 1st day of March in each year, the licensee shall submit a sworn statement to the Minister,

- (a) detailing the amount and manner of all expenditures made by him in geophysical, geological or other exploratory work as prescribed in section 8; and
- (b) giving full particulars of the work and operations carried on by him,

during the previous calendar year on the area described in the licence, but where the Minister consents thereto, the licensee may include expenditures made by him but not filed on the previous statement because of the unavailability of records.

(2) Where the Minister is not satisfied by the sworn statement of the licensee that he has expended the sums required by section 8 for which the statement has been submitted, the Minister may send a notice by mail to the licensee at his latest address recorded in the Department, requiring him to submit

such further details as are in the opinion of the Minister necessary to prove that the expenditure complies with the requirements of section 8 and if the licensee is still unable to satisfy the Minister that the expenditures have been in compliance with the requirements of section 8, the Minister may disallow the expenditures or any part of them.

(3) No expenditures other than those detailed in the sworn statement referred to in subsection 1 and allowed by the Minister shall be credited to the minimum required to be expended under section 8. O. Reg. 546/71, s. 17.

18. While a licence is in force, the licensee has the sole and exclusive right to drill for natural gas on the area described in the licence. O. Reg. 546/71, s. 18.

19. Where drilling in any of the waters referred to in subsection 1 of section 1 has been suspended by a competent authority, or the licensee is prevented by weather, water, or other condition acceptable to the Minister and the suspension or other condition is not annually recurring, the Minister may reduce the rental and amounts required to be expended under section 8 for the year during which the suspension or condition occurs. O. Reg. 546/71, s. 19.

PRODUCTION LEASE

20.—(1) Upon application to the Minister, a licensee shall be granted a lease in Form 2 to produce natural gas if the Minister is satisfied that a well drilled on the area described in the licence, or in a licence for a contiguous area held by the same licensee, has indicated the presence of natural gas.

(2) The area to be included in a production lease shall be selected by the licensee from the area described in his exploratory licence and shall not be composed of unit areas of less than one tract except where the Minister grants approval, or as provided for in section 3.

(3) Where the Minister is not satisfied that the area to be included in a production lease as selected by the licensee has been proven to reasonably contain natural gas, he may decrease the area accordingly.

(4) Every application for a production lease shall be accompanied by,

(a) the rent for the first year of the term; and

(b) a description of the area to be included in the production lease.

(5) The annual rental for a production lease is \$315 for each whole tract and 50 cents per acre for each partial tract, payable in advance, but during the first year of the lease where such period is less than twelve months, the rental shall be determined on a *pro rata* basis.

(6) A production lease shall be for a term not to exceed ten years and shall have an anniversary date of January 1st.

(7) Where production of natural gas is obtained and production continues beyond the life of the lease, the Minister shall renew the production lease or portions thereof for successive periods of not more than ten years each.

(8) Royalty is payable to the Treasurer of Ontario on natural gas marketed off the lease at the rate of 10 per cent of the prevailing field price or \$0.035 per thousand cubic feet, whichever is greater.

(9) The amount of royalty payable in any year shall be reduced by,

(a) the amount of rental paid for that year; and

(b) the amount of allowable pipeline construction credit,

up to a maximum of 50 per cent of the royalty payable.

(10) In calculating the amount of royalty payable, the production of each lessee for each pool shall be considered and the amount of rental and pipeline construction credit shall be credited on the basis of pool production.

(11) Where production from more than one pool is commingled under authority of *The Petroleum Resources Act, 1971*, the Minister may approve the calculation of the amount of royalty payable on the basis of more than one pool but such calculations shall be subject to approval by the Minister.

(12) The rate of allowable pipeline construction credit shall be based on the total construction cost for each pipeline as approved by the Minister and subject to clause *b* of subsection 9, shall not exceed 25 per cent of the total cost in the first year, 20 per cent in the second year, 10 per cent in the third, fourth and fifth years and 5 per cent in the sixth, seventh, eighth, ninth and tenth years but the Minister may allow credits not used in one year to be carried forward to successive years.

(13) Detailed plans and cost estimates for all pipeline construction shall be submitted to the Minister in duplicate and shall be approved by the Minister prior to commencing such construction.

(14) On or before the 1st day of March in each year, the lessee shall submit a sworn statement to the Minister, detailing the amount of all pipeline construction expenditures made by him during the previous calendar year.

(15) Where the Minister is not satisfied by the sworn statement of the lessee, the Minister may send a notice by mail to the lessee at his latest address recorded in the Department, requiring him

to submit such further details as are in the opinion of the Minister necessary to establish the allowable pipeline construction credit.

(16) The Minister may disallow the expenditures or any part of them.

(17) No expenditures other than those detailed in the sworn statement referred to in subsection 14 and allowed by the Minister shall be credited in calculating the amount of royalty payable.

(18) Where production of natural gas is restricted or limited under *The Petroleum Resources Act, 1971*, the regulations thereunder or any order of the Ontario Energy Board, the Minister may reduce or suspend the rental payable by the lessee in such manner and to such extent as he considers proper.

(19) The lessee shall,

(a) keep a record of all natural gas produced, marketed or otherwise disposed of each year under the production leases held by him; and

(b) on or before the 1st day of March in each year, submit to the Minister a sworn statement showing the cost of pipeline construction and the quantity and actual meter value to the lessee of all gas marketed during the previous calendar year, together with a remittance for any royalty payable for that period, as provided for by subsection 10.

(20) Where a well is drilled in an area contained in a production lease and where it is acceptable to the Minister, the lessee or lessees may submit the actual amount expended by him in the drilling of such a well as an expenditure for licences, as required by section 8.

(21) A lessee may, on thirty days prior written notice to the Minister, surrender the whole or any part of the area included in a production lease provided that the area being surrendered complies with section 3 and all wells are plugged or bonded as provided for by *The Petroleum Resources Act, 1971* and regulations thereunder.

(22) Where a surrender has been made under subsection 21, the annual rental for the year in which the surrender is made shall be based on the area included in the lease at the commencement of that year, but the annual rental for ensuing years shall be based on the area being retained. O. Reg. 546/71, s. 20.

21. Where a production lease is terminated under section 23, the Minister may offer for sale by tender, the right to obtain such lease or leases in whole or in part and shall give public notice of the sale, specifying the area or areas and the method of tendering. O. Reg. 546/71, s. 21.

22.—(1) Where oil is encountered while drilling for natural gas, the area included in the licence that has been proven to reasonably contain oil shall be surrendered by the licensee, but the licensee shall have the first right for a production lease if a lease to produce oil is granted.

(2) Notwithstanding subsection 1, the licensee may, with the consent of the Minister, retain the area required to be surrendered, for the purpose of exploring for natural gas at a shallower depth to that at which the oil is encountered. O. Reg. 546/71, s. 22.

GENERAL

23. If default is made,

(a) in the performance or observance of the terms and conditions of an exploratory licence or of the Act or this Regulation; or

(b) by a lessee in payment of rent or royalties, or both or in the performance or observance of the terms and conditions of the production lease or of the Act or this Regulation,

and the default is not remedied within thirty days after notice has been delivered or sent by registered mail to the holder of the exploration licence or production lease as the case may be, at his latest address recorded with the Department, setting forth the default and calling upon him to remedy the default,

(c) in the case of an exploration licence, the Minister may forthwith cancel the licence; or

(d) in the case of a production lease, the Minister may forthwith declare the lease terminated. O. Reg. 546/71, s. 23.

24. The holder of a licence or a lease shall carry out all exploration, drilling and production operations in accordance with *The Petroleum Resources Act, 1971* and the regulations thereunder and any orders made by the Ontario Energy Board. O. Reg. 546/71, s. 24.

25.—(1) The holder of a licence may, with consent of the Minister, transfer or assign to any other person, the rights conferred under the licence with respect to the whole or any part of the acreage covered by the licence provided that in no case shall the holder of the licence retain any interest in that portion of the licence affected by the transfer or assignment.

(2) The holder of a lease may, with the consent of the Minister, transfer or assign to any other person the rights conferred under the lease with respect to the whole or any part of the acreage covered by the lease. O. Reg. 546/71, s. 25.

26. Where any uncertainty or dispute arises respecting the position of any boundary, the Minister may require the licensee or lessee to make and file a cadastral survey acceptable to the Minister showing the boundary in respect of which the uncertainty or dispute has arisen. O. Reg. 546/71, s. 26.

27. Regulation 603 of Revised Regulations of Ontario, 1970 is revoked. O. Reg. 546/71, s. 27.
